

Page Break Feature

Page Break feature helps in sectioning the activity form in different parts. It helps in identifying the different information required to be filled like Personal info, Professional info and visit details so on.

Follow the steps below to enable the 'Page Break':

1. From **Navigation Menu**, go to **Configuration** option.
2. Click on **Activities** and then choose the activity form by clicking on **pencil icon**.
3. Click on **Page Break** tab on the interface list on the left side.
4. Create as many pages as required.
